

# MILITARY INITIATIVES

## Remote Applications

# RAPID RESPONSE

## Remote Communications Platform (RCP)

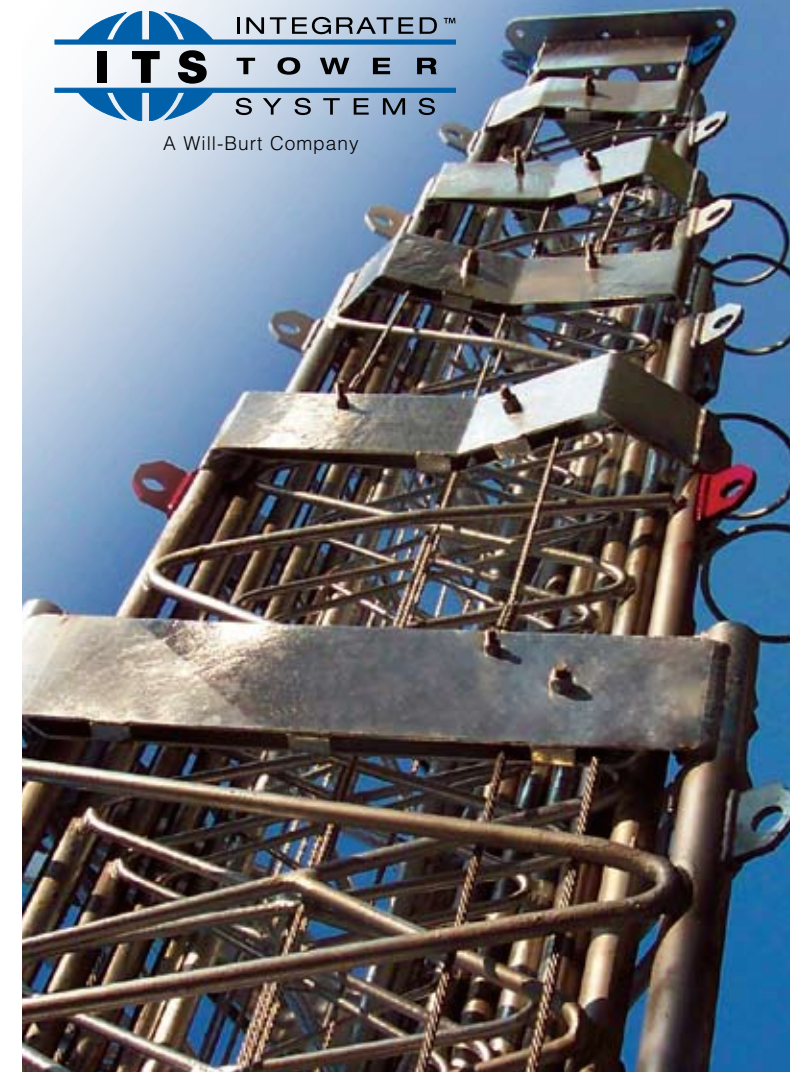

- 30m ITS Tower; 550 lb Head-load
- Self-Supporting or Guyed Operation
- 35' OAL, 141" OAH
- 26K GVWR (33K Capable)
- 100-Gallon Fuel Capacity
- < 1 Hour Setup

- Portable Masts
- Military Masts
- Pneumatic Masts
- Night Scan Lighting

# RAPID RESPONSE SOLUTIONS

- Disaster Recovery • Military Initiatives • Contingency Planning
- Telecommunications • Wireless Development • Restoration

INTEGRATED TOWER SYSTEMS offers clients a unique opportunity to "reserve" ITS equipment as part of their contingency planning and emergency preparedness efforts.

The ITS Flexi-Fleet™ Program helps ensure that individualized portable tower systems, often pre-integrated to fulfill clients' specific requirements, remain on standby for immediate deployment in case of emergency.

Fixed fees, geographic staging, and in-house transportation and freight logistics minimize critical response time and optimize efficiencies.

Manufactured to withstand the world's most demanding environments, ITS portable tower systems, COWs, mast and satellite units, mobile command centers and other rapid-deployment equipment are proven key components in establishing the flow of vital information from remote and urban areas of need.

ITS offers customers in-house and field services, including equipment integration, training and deployment coordination to assist with both long-term and temporary use requirements.

Advanced, cost effective portable platform for electronic communications and surveillance. Scalable, seamless and interoperable. Like all ITS Rapid Response Solutions, this communications platform is totally self-contained and easy to deploy by as few as two people.

### Typical Integrated Package:

- (1) VHF Repeater
- (1) UHF Repeater
- (1) 800MHz Repeater
- Dual SINGGARS Shelf
- AN/VRC-111 Shelf
- 3.65GHz 802.16e PMP Network (Sectorized)
- (2) 4.5GHz PTP Radio
- VHF/800MHz Mobile
- ACU-M w/WAIS Interop
- 802.11 a/g/n (Local)
- Sensor Suite ~ Surveillance, Communications, Lighting, etc.

The Will-Burt Company, an employee-owned, ISO 9001:2008 certified company, is the world's premier manufacturer of telescoping masts and light towers for target industries and specialty applications with a focus on quality, performance and ongoing product support. Primary industries served include:

- Fire / Rescue
- Military
- Cellular
- Police / Security
- Broadcast
- Emergency Response

### Portable Masts – Portable Field Masts for a Variety of Payload Applications

- Quick Erecting Antenna Mast (QEAM)
- The Expedition Series
- Hurry-up Telescoping Masts

### Military Masts – Mechanical, Pneumatic and Portable Telescopic Masts

- Mechanical – Stiletto and Stiletto HD
- Pneumatic – Locking and Non-locking Masts
- Portable Masts – QEAM, Expedition Series

### Night Scan Lighting

- Roof-mounted and Vertical-mounted Telescoping Mast Lighting System

### Pneumatic Masts – Locking and Non-locking Telescopic Masts

- Standard Duty, Heavy Duty and Super Heavy Duty

# EMERGENCY Public Safety

**INTEGRATED TOWER SYSTEMS** – *ITS* is North America's premier OEM source for rapid-deployment Portable Tower Systems, Communication-Sites-on-Wheels (COWs), and Mast-, Satellite- and Tower- Integrated Mobile Command and Communication Centers.

**Our specialty:** Innovative, fully customized portable solutions to support the emergency response and long-term communications, surveillance, lighting, test and other common and proprietary requirements of a diversified and sophisticated global clientele.

Designed, engineered and manufactured by *ITS* for all-terrain or urban deployment, *ITS* equipment can be configured for transport by C-130 aircraft, helicopter, flatbed trailer or light-duty truck.

# Vast Inventory. Wide Variety. Immediate Availability.

## Self-Supporting, Fully Automated Tower Systems

*ITS* portable towers and COWs are designed for the quick and seamless integration of client-specific and *ITS*-furnished technologies. Our rapid response platforms support both common wireless solutions and proprietary / emerging applications.

## Standard *ITS* Tower Structure Specifications & Features

- Greatest self-supporting and guy-capable survivability of any comparable lattice steel telescopic structure ~ **No guy wires required** at any elevation to a maximum antenna area and design wind velocity
- Certified compliance with the **ANSI TIA/EIA 222-G** Standard ~ Legs: seamless, mechanical tubing ~ HSS-ASTM DOM 1026 alloy/A513, **70-95Ksi yield strength** ~ solid rod bracing-ASTM A36, 100% hot-dipped galvanized
- Elevations to 130'/40m ~ Payloads to 750 lbs/340kg ~ Configurations with wind survivability to 130mph/209km/hr
- Direct drive, **extreme environment** tower operating system ~ No exposed belts or chains ~ Aircraft quality cables, stainless pulleys and hardware, solid-state circuitry ~ **Integrated safety features**
- Extended tower and transport lock mechanisms ~ Redundant cabling for increased safety ~ LED warning and tower operating lamps

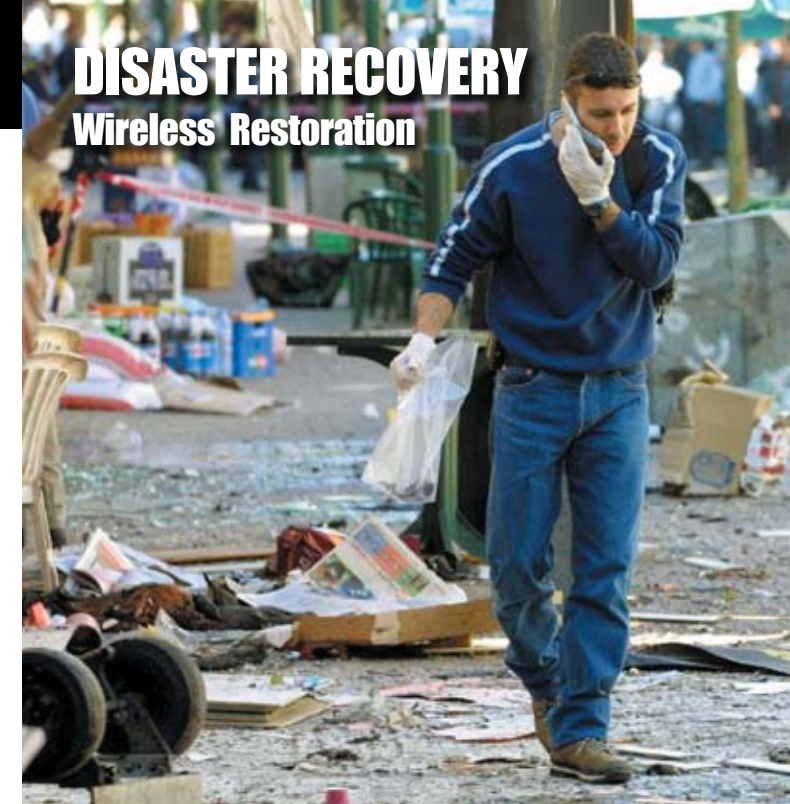

## Representative *ITS* Equipment – Commercial & Military Configurations

- Portable Tower Systems - Trailer, Skid, Vehicle or Fixed Foundation Mounted
- Self-Supporting Telescopic Structures from 38' to 106' Standard, Customized to 127'
- Mobile Command & Control Centers; Fully Integrated, Climate Controlled Shelters
- All-terrain or Urban Models; Support or Tactical Functions, Extreme Environment
- Vehicle, Aircraft, Helicopter, Rail, Sea or Flatbed Transportable Models

- Mobile Satellite, Mast, Lighting and Power Generation Systems
- Commercial-Off-the-Shelf (COTS) and Customized Configurations
- Communications-Site-on-Wheels (COW) ~ GVWR to 30-Tons
- Communications-on-Light-Truck (COLT) ~ Civilian and Military
- Manufacturing, Sales, Rentals & *ITS* Flexi-Fleet™ Programs

# DISASTER RECOVERY Wireless Restoration

## Domestic and International Industries Served

- Public Safety, Homeland Security & Emergency Management
- State Government, Regional Agencies and Local Municipalities
- Military Forces; First Responders & Disaster Recovery Personnel
- Federal & Local Law Enforcement; Contingency Planning Units
- Wireless Network Carriers, Multi-Media Organizations
- Tower Owners/Operators, Broadcasters, Infrastructure Developers
- Defense Contractors, Transportation/ Logistics Professionals
- Special Event Coordinators, Civic Groups, Private Enterprise
- Telecommunications, Security, Construction, Aerospace, Oil & Gas, Petrochemical, Aviation, Meteorological, Entertainment & Others

## Sales and Rental Alternative

*ITS* offers a wide variety of innovative, efficient and affordable sales and rental alternatives to meet clients' temporary and long-term needs.

*ITS* owns and manages North America's largest and most comprehensive sales inventory and rental fleet. From a number of Affiliate facilities, the Company delivers fast, responsive service to both its domestic and international clientele.
